It was state-of-the-art when Techno-Gadgets Inc. built it for a top-secret project. Someone in the head office had this brilliant idea: combine nanotechnology with genetic engineering to create a new generation of gadgets. The payoff could be huge. To ensure security, the Lab was built in the middle of a remote swamp. For years the Lab was a happy workplace. It was home to a team of human scientists, engineers and designers, who worked to create a bold new class of consumer products. The corporate marketing folks came up with the name Technobuggies.
